ACERCA DE

HIMEDIC
IMPLANTES TRAUMATOLÓGICOS Y MAXILOFACIAL

En HIMEDIC construimos soluciones ortopédicas con un solo propósito: ayudar a los equipos quirúrgicos a trabajar con confianza. Ofrecemos implantes ortopédicos, instrumental y sets orientados a procedimientos, diseñados para un desempeño confiable, un ajuste consistente y una usabilidad práctica en quirófano.

Somos una compañía enfocada en la calidad. Esto significa que cuidamos los detalles que importan: control de materiales, precisión de mecanizado, acabado superficial, empaque limpio e inspección exhaustiva, para que cada envío sea consistente y predecible. Nuestros equipos siguen procesos estructurados y controles documentados que respaldan la trazabilidad y la continuidad de calidad entre lotes.

Nuestro portafolio ortopédico cubre necesidades de trauma y reconstrucción, incluyendo sistemas de placas y tornillos, clavos intramedulares/interlocking, componentes de prótesis de cadera/artroplastia y columna, junto con una amplia gama de instrumental ortopédico y sets de instrumentos.

Comprometidos con nuestros socios

Trabajamos de cerca con distribuidores, licitaciones y equipos de abastecimiento hospitalario que necesitan más que productos: necesitan confiabilidad. Desde una planificación de producción estable hasta documentación lista para exportación, nuestro enfoque está diseñado para simplificar y escalar el abastecimiento.

- **Manufactura consistente:** procesos controlados y puntos de inspección definidos.
- **Soluciones listas para quirófano:** instrumental y sets pensados para la eficiencia del flujo de trabajo.
- **Soporte al socio:** comunicación oportuna y documentación clara.
- **Capacidades OEM y marca privada:** branding, soporte de empaque y planificación de suministro a largo plazo.

Firm-Lock Small Plate 3.5mm
Ref. No. 606
